Conservation Winds

August 30, 2017

10:00 a.m. to 3:00 p.m.

**Campbell County Public Library - Wyoming Room
Gillette, WY**

Cheatgrass - Why is it a problem? Because it promotes fire, is an unreliable forage, can do damage to livestock when mature and displaces native perennials.

If you would like to learn about the potential to get ahead of the problem now and discover management approaches that could work for you, attend this FREE workshop!

Brian Mealor, Director and Associate Professor with the U/W Sheridan Research and Extension Center will provide information and updated data to help landowners and managers understand how to better manage cheatgrass.

In addition, Campbell County Weed and Pest will share their information and discuss Dalmatian Toadflax and bulbous bluegrass in the County.

**Hosted by the Campbell County Conservation District
FREE LUNCH - RSVP to 682-1824 before August 23rd!**

BOARD OF SUPERVISORS

SCHEDULE OF EVENTS

August 1-7, 2017	Campbell County Fair
August 9, 2017	CCCD Board Meeting
August 12-19, 2017	Wyoming State Fair
August 21, 2017	Total Solar Eclipse
August 30, 2017	Cheatgrass Management Workshop
September 4, 2017	Labor Day - office closed
September 5, 2017	CCCD Board Meeting
September 11-14, 2017	Pacific and Southwest Regional meeting in Tucson, AZ
September 12, 2017	Area I meeting in Newcastle
October 9, 2017	Columbus Day - office closed
October 10, 2017	CCCD Board Meeting
October 12, 2017	Soil Health Workshop with Marlon Winger, NRCS

Rangeland Principles and Soil Health Workshop in Gillette

It all begins with the soil was the key point made during the Rangeland Principles and Soil Health Workshop held on June 1 in Gillette. Cameron Clark, NRCS Area Resource Soil Scientist demonstrated the rainfall simulator showing the interaction between soil and water, and the influence that soil type and management have on water infiltration.

Blake Hauptman, University of Wyoming Extension Educator examined grazing sustainability and the economics associated with different practices.

Tim Kellogg, NRCS District Conservationist reviewed soil biology 101.

Thank you to those who attended and to our Presenters!

4th Grade Free Seedling Tree Program

A **Campbell County Parks and Rec Department 1% grant** has sponsored a seedling tree for every 4th grade student in Campbell County in 2017. A total of 270 Rocky Mountain Juniper and 270 Ponderosa Pine seedling trees were purchased for distribution to students in 15 schools. Crystal provided tree education activities to all of the participating 4th grade students.

Our goal is to educate the youth of Campbell County to ensure the next generation will be wise stewards of America's natural resources. The project also helps youth develop citizenship values and respect for the environment.

4th grade students at Rozet holding their trees.

DO YOU WANT MORE FROM YOUR LAND?

**WOULD YOU LIKE TO IMPROVE THE HEALTH OF YOUR
SOIL?**

**You are invited to participate in a very interactive
gathering of passionate speakers!**

OCTOBER 12, 2017

10:00 AM TO 3:00 PM

CAMPBELL COUNTY REC CENTER-CANYON ROOM

250 SHOSHONE AVENUE, GILLETTE, WY

Marlon Winger, NRCS Soil Health Specialist for Wyoming, Idaho, and Montana will be presenting the FIVE basic principle keys to improving the health of your soil. Also, how to increase production, profit and ensure the health of your land for generations to come by incorporating plant diversity, no-till farming, and grazing cover crops.

FREE WORKSHOP hosted by the CCCD—lunch provided

RSVP by October 2 to 307 682-1824

Deep Pot Cottonwoods for Riparian Restoration

Cottonwood trees play an important role in many of Wyoming's riparian systems, but multiple stressors may be leading to reduction in establishment of new cottonwoods from seed. Various efforts have been undertaken to restore cottonwoods to areas where they have been depleted. Research from USDA in Montana indicates that transplanting cottonwoods grown in deep pots (>24" depth) improves transplant survival and subsequent growth.

To test this research, the CCCD started a project in the Spring of 2017 to see how this might be applicable to Campbell County.

Goal: To produce sufficient numbers of deep-potted cottonwood trees from locally-sourced cuttings and purchased plant materials to support a future evaluation of transplant survival in a Campbell County riparian area.

Objectives: Specific objectives are to propagate multiple cottonwood trees in deep-pots in the Sheridan Research and Extension Center greenhouse and high-tunnels so they are ready for transplanting into a field setting in spring 2017.

Expected Impact: The cottonwoods grown from this initial project will support a planned restoration project and evaluation of plant materials in Campbell County. Information gained from this project will assist landowners and conservation partners with riparian restoration projects into the future.

With the assistance of a grant from the Wyoming Wildlife and Natural Resource Trust (WWNRT), the CCCD staff planted 60 trees each at two fenced sites in Campbell County in May 2017.

Three categories of cottonwood stock (20 of each - 1 yr. old bareroot, deep pot from purchased bareroot, and deep pot from local stock cuttings) were planted and weed barrier was added to 10 trees of each type. Protectors were provided for each tree also. The seedlings will be evaluated in the Fall and Spring for 3 years.

We are very excited to initiate this project and would like to thank the participating landowners, the University of Wyoming/Sheridan Research and Extension Center and WWNRT for their partnership!

MAY

- On May 2, Jay traveled to Newcastle for a workshop on Soil Health and the Rainfall Simulator.
- Crystal educated 55 - 1st grade students from Paintbrush with the nature walk at McManamen Park on May 3.
- 2545 preordered seedling trees were unloaded on May 4 and handed out on May 5.
- Debbie and Jay attended the Wyoming Public Lands Initiative - Fortification Creek Advisory Committee, meeting on May 8.
- May 8 through May 15, Crystal provided an educational activity and handed out free seedlings trees to 495 - 4th grade students.
- May 9, Jennifer attended the Joint Ag Committee meeting in Hulett.
- All staff attended the Board meeting on May 9.
- Bob Maul, Tim and Jennifer traveled to Newcastle May 11 to attend the Local Work Group meeting.
- Jennifer and Debbie planted 60 cottonwood seedlings on one landowner for the deep potted project on May 15.
- May 16, Jennifer and members of the Forestry Strategy Collaborative Advisory Group presented the Forestry Strategy Plan to the Campbell County Commissioners.
- On May 17, Jennifer traveled to Rapid City for the National Forestry Advisory Board meeting.
- Crystal provided the Enviroscope educational activity at Pronghorn school on May 23 to 60 -3rd grade, 42 kindergarteners, and 17 - 1st grade students.
- On May 24, Jennifer and Debbie planted 60 cottonwood seedlings on the second landowner for the deep potted project.

JUNE

- A Rangeland/Soil Health workshop hosted by the CCCD was held on June 1 and attended by 15.
- Jay and Tim were in the field with Marlon Winger, NRCS Soil Health Specialist on June 5 and June 6.
- Debbie attended the Fortification Creek WPLI meeting on June 5 and on June 6 an aerial tour of the area was provided for the committee members.
- June 5 and 9, Jennifer and Crystal assisted with WY Resource Education Days camp in Newcastle.
- Jennifer and Jay assisted Audubon Rockies with netting cliff swallows on Donkey Creek on June 7.
- June 7, Jennifer attended the Thunder Basin National Grassland Cooperative Working Group meeting in Gillette.
- Jay and Debbie visited the Master Gardeners test Rain Garden in Gillette on June 8.
- NRCS Forestry Field tour was held June 12-14. Jennifer, Tim and 13 NRCS, State Forestry and District staff attended.
- The Board meeting on June 13 was attended by all staff.
- As Camp Director, Crystal conducted the Black Hills Natural Resource Youth Camp in Newcastle, June 14-16 for 92 youth from 5 counties.
- On June 14, Jay traveled to Sheridan for the Medusahead, Ventenata and Cheatgrass Workshop in Sheridan.
- Bob Maul, CCCD board member and Bridger Plant Material Center board member, attended the Bridger Plant Material Field Day on June 14 in Bridger, MT.
- Debbie attended the CC Natural Resource Land Use Plan meeting on June 15.
- Jennifer attended the NACD Forestry Resource Policy Group (RPG) meeting in Deadwood, South Dakota, June 19-22. This was a joint meeting with the National Association of State Foresters' Forest Resource Management Committee.
- Crystal provided the "Wiggly Worms" activity on June 20 for the Lakeview Summer Library Program with 19 students ages kindergarten through 6th..
- As a WPLI committee member, Debbie toured the Fortification Creek area with the committee members and commissioners on June 25.
- On June 27, Crystal provided the "Spiders" activity to 19 Lakeview Summer Program students and the "Animal Tracks" activity to the 28 Hillcrest Summer Program students.
- On June 28, a Campbell County forestry field tour promoting the "Campbell County Forestry Strategy" was attended by 18. Attending were members of the CC Fire Department, BLM, Wyoming State Forestry, US Forest Service, NRCS, Field Representatives for Senator Enzi, Representative Cheney, and Senator Barrasso, CC Commissioner Kissack and the CCCD.
- Jay and Brandon educated 67 (K-12) students with the "Animal Tracks" activity during the Social Skills Camp on June 29.
- A special board meeting was held June 30 to approve the fiscal year end expenditures.

JULY

- On July 7, Jennifer and Debbie traveled to Sheridan to participate in the Sheridan Research and Extension Center Field Day.
- Crystal provided a solar oven activity to the Lakeview Summer Library Program on July 10 with 12 students.
- Jennifer attended a Spring Creek Grazing Association meeting on July 10 to discuss proposed projects.
- On July 10, Debbie attended the Fortification Creek WPLI meeting.
- All staff attended the Board meeting held on July 11.
- Crystal provided the pizza box solar oven activity for 14 Wright library summer program students on July 12.
- July 15 and 16, Crystal traveled to Buffalo to participate in the Project Learning Tree Facilitator Workshop.
- On July 18, 20 Child Development youth learned about Spiders with Crystal.
- Crystal made rain sticks with the 17 Lakeview Summer Library Program students on July 19.
- On July 20, Crystal provided the stream trailer activity for 20 of the 4H Cloverbuds.
- Jay and Debbie plan to began the water monitoring of the Little Powder River on July 27
- On July 31, Jay and Debbie plan to began water monitoring on Donkey Creek/Stonepile Creek.

“Conservation: We’re All In”

By Anita Bartlett, Powder River Conservation District

A total of 92 area youth gathered at Mallo Camp north of Newcastle, WY to participate in the Black Hills Natural Resource Youth Camp, June 14-16th. The purpose of this camp is to give youth the opportunity to experience a wide variety of activities and educational sessions teaching them about the natural world and its resources. Other activities included fishing, the Wildman Hike which teaches kids about predators and prey relationships, a talent show, and various games.

Each child participated in six educational sessions they included: “Animal Adaptations”, “Fire!”, “Trees, Trees, Trees”, “Casting for Food”, “Stream Detectives” and “Target Practice”.

“Animal Adaptations”, presented by Lacey Sloan with the Weston County Natural Resource District taught campers about adaptations that animals have in order to

survive in their environments. Kids had the opportunity to see hides and body parts that showed these adaptations.

Jessie Halverson, with Project Learning Tree presented “Trees, Trees, Trees” where campers learned how to age and measure a tree, to identify different parts and types of trees, and what trees need in order to survive.

In the session “Fire!” Jeremy Dedic and Jonathon Sloan, with Wyoming State Forestry, and Jake Shook, with Shook Logging, explained to the youth the importance of removing trees to keep forests healthy and reduce the risk of fire. They gave the kids the opportunity to see tree removal equipment in action and even allowed many of them to use a cross cut saw.

Mike Locatelli & Dyllon Lincoln with Wyoming Game and Fish and John Marshall taught campers all about “Casting for Food”. This activity taught campers how to cast, fish, and properly care for caught fish. Campers were allowed to practice their casting skills and catch fish.

“Stream Detectives” presented by Jason Martineau, Chad Reiger and Ben Wollenzien from Wyoming DEQ gave a demonstration how to take a few simple water samples to test the health of a stream and how to collect Macroinvertebrates. Both the samples and the type of Macroinvertebrates found in the stream help them to determine if a stream is healthy or not.

Finally, Bob Pollo, Paul Connelly, Steve Miller, and Karson Kellebrew had “Target Practice”. They taught youth the correct way to shoot a bow and arrow, safety while shooting and let the kids do a little “target practice”.

Sponsors for the Black Hills Natural Resource Youth Camp were Weston County Natural Resource District, the Campbell County Conservation District, and the Powder River Conservation District, and a Campbell County Community Public Recreation District Grant.

WYOMING PUBLIC LANDS INITIATIVE

Forti-

Fortification Creek Advisory Committee Update

By Debbie Hepp, Program Assistant

The WPLI is a collaborative, county-led process intended to result in one state-wide legislative lands package that is broadly supported by public lands stakeholders in Wyoming. The ultimate goal is final designation or release of Wyoming's 42 BLM and 3 USFS Wilderness Study Areas in Wyoming.

Representing Conservation, Debbie has been appointed to the Fortification Creek WPLI Committee by the Campbell County Commissioners. The Committee will develop a proposed management recommendation for the Fortification Creek Wilderness Study Area (WSA). Members have the responsibility to keep the interest groups they represent informed about the actions and outcomes of the process. Debbie will be posting updates every quarter in the CCCD newsletter and citizens can also access more detailed information at <https://www.ccgov.net/1651/WPLI-Fortification-Creek>.

The Committee met for their fourth meeting in Buffalo in **April**. Congressional and BLM designations were reviewed. The BLM presented maps and resource information also. The **May** meeting consisted of approving the Charter, reviewing a proposed timeline, and appointing Kelly Patten to replace Todd Anderson, representing Sportsman. Discussion was held concerning the Campbell County Natural Resource Land Use Plan supporting the final designation. A representative from Rocky Mountain Elk Foundation (RMEF) provided information on the proposed easement application in the vicinity of the Fortification Creek WSA. During the **June** meeting the committee signed the Charter. Chairman Little mentioned receiving public letters requesting consensus vs majority vote and explained the committee elected to remain with majority vote. Campbell and Johnson County Weed and Pest Supervisors presented their history of spraying weeds for federal agencies and the weed situation near and on Fortification. Bob Budd, Director of Wyoming Wildlife Natural Resource Trust explained the WWNRT application process and the situation with the removal of the RMEF application for a WWNRT easement in the vicinity of the Fortification WSA during this past legislative session. Flight-line Inc. donated aerial tours of the Fortification area for committee members on June 5 and 6. Barry Hayden provided a guided ground tour on June 25 for committee members and Campbell and Johnson County Commissioners. The **July** meeting was a review of the aerial and physical site visits, and the BLM designation types and applicability to the Fortification Creek area.

ADVERTISEMENT FOR BIDS

Sealed bids are being accepted by the Campbell County Conservation District (CCCD) at the CCCD office, 601 4 J Court, Suite D, Gillette Wyoming 82716 until 3:00 PM MST, Tuesday, August 8, 2017 for the purchase of:

1990 Top Hand car trailer

Length: 18'

Axles: 2

Low mileage tires

All bids must be submitted in a sealed envelope and clearly marked "Bid for CCCD Trailer". Please contact CCCD at (307) 682-1824 with any questions regarding specifications or to make an appointment to view the trailer before bidding. Photos of the trailer are posted on the CCCD website: www.cccdwy.net.

The Campbell County Conservation District reserves the right to reject any and all bids, to waive any irregularities or informalities in any bids.

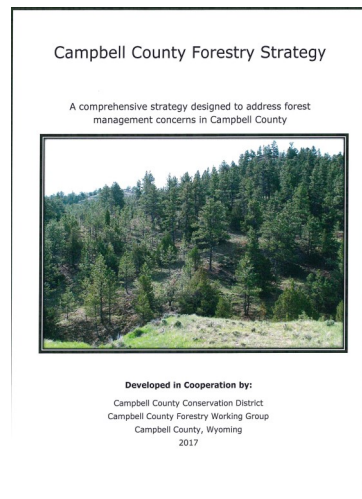

Campbell County Forestry Strategy

When discussing forests in Wyoming one typically envisions Bridger Teton National Forest or perhaps the Black Hills National Forest. Typically we do not associate places like Campbell County with forests; however they are present and face challenges similar to many of the large forests in the state. The challenges can range from drought to increased residential development and from highly destructive wildfires to insects and diseases. These challenges can lead to a lack of forest resiliency and the inability of the forest to support the full range of multiple uses that our citizens enjoy.

The mission of the Campbell County Forestry Working Group is to facilitate landscape scale forest management activities across ownership boundaries, through the development and integration of focus areas in Campbell County, helping to promote overall forest health. The working group is composed of

stakeholders that have active roles in forest resource management in Campbell County. It was formed to generate recommendations on future management direction in the below specific topics taken from the Wyoming Statewide Forest Resource Assessment of June 2010:

- Fire
- Invasive & Noxious Species
- Native Damaging Agents
- Rural Interface
- Storm events
- Wildlife Habitat Concern
- Water Quality and Supply
- Agroforestry
- Forest Stewardship Potential
- Timber Industry
- Potential Markets

An example of loss of canopy cover and conversion to grasslands associated with high intensity wildfires in northern Campbell County.

Hosted by the CCCD, eighteen individuals representing the Campbell County Fire Department, Bureau of Land Management, Wyoming State Forestry Division, US Forest Service, NRCS, field representatives for Senators Enzi and Barrasso and Representative Cheney, CC Commissioner, and the CCCD were provided a field tour on June 28 of northern Campbell County. Thinning projects, forest stewardship potential, fuels reduction, fire, rural interface, and cooperation with adjacent landowners were the topics of discussion.

Following a written comment period, the Campbell County Forestry Strategy designed to address forest management concerns in Campbell County, was approved July 3, 2017 by the Campbell County Forestry Working Group. The CCCD Board of Supervisors adopted the Strategy at the board meeting on July 11, 2017.

The funding for the strategy was made possible through the Forestry Collaborative Assistance Program administered by Wyoming State Forestry Division.

Thunder Basin National Grasslands

Working Group

By Jennifer Hinkhouse, District Manager

On June 7, 2017 the U.S. Forest Service (USFS) hosted a cooperative working group meeting in Gillette, Wyo. To continue its collaborative discussion on the Thunder Basin National Grasslands (TBNG), and more importantly the prairie dog issues that exist in the area.

This was the third of six scheduled gatherings in 2017 for the land management and resource cooperative working group. The meetings are being facilitated by the University of Wyoming Ruckelshaus Institute of Environment and Natural Resources, and working group members range from Conservation Districts to County Commissioners. Jennifer Hinkhouse with the Campbell County Conservation District, Commissioner Avery, and Quade Schmelzle with the Campbell County Weed and Pest represent the landowners in Campbell County on the working group. The group discussions are open to the public; however, in order to meet Federal guidelines regarding cooperative working group meetings, only local, state, Federal, and tribal government representatives may participate in this particular group. Members of the public are encouraged to contact their working group representatives and/or attend the learning series workshop to provide input.

The June 7 meeting included discussion on the working group charter, and exploration of implementation options for on-the-ground efforts. Zach Walker with the Wyoming Game & Fish Department provided the working group with information on the current status of the Black-footed Ferrets and a brief history of the recovery efforts to date. He also stated that given the social issues surrounding the prairie dog issue the Wyoming Game & Fish Department does not advocate the release of Black-footed Ferrets on the TBNG.

Several organizations also presented information on lethal and non-lethal control of prairie dogs, and provided examples of how this might be applied on the TBNG. Non-lethal prairie dog management techniques included: translocation, visual barriers, and fencing. Lethal methods included discussion on rodenticides and their various applications and restrictions.

The next series of meetings will be in Douglas. A public Learning Series Workshop will be Wed., Aug. 23, and the Cooperative Working Group meeting will be Thurs., Aug. 24.

Online information on Thunder Basin Prairie Dog Colony Management by the U.S. Forest Service can be found at, www.fs.usda.gov/goto/MBRTB/PrairieDogs. Online information from the Ruckelshaus Institute on Thunder Basin Collaboration can be found at, www.uwyo.edu/haub/ruckelshaus-institute/

Plague Confirmed in Northeastern Wyoming Prairie Dog

Plague infection was recently confirmed in a northeastern Wyoming prairie dog, according to the Wyoming Department of Health (WDH). No human cases have been identified.

The infected prairie dog was discovered in the Converse County area of the Thunder Basin National Grassland. The infection was confirmed by the Wyoming State Veterinary Laboratory. Local U.S. Forest Service personnel have also described seeing signs of significant prairie dog die-offs.

“Plague is a serious bacterial infection that can be deadly for people and for animals, including pets, if not treated promptly with antibiotics,” said Dr. Alexia Harrist, state epidemiologist and acting state health officer with WDH. “The disease can be transmitted to humans from ill animals and by fleas coming from infected animals.”

More information about plague is available from WDH at <https://health.wyo.gov/publichealth/infectious-disease-epidemiology-unit/disease/plague/> or from the federal Centers for Disease Control and Prevention at <http://www.cdc.gov/plague/>.

New Invasive Grasses Found in NE Wyoming!

By Aaron Ide, CC Weed and Pest

As some of you might know, two new species of annual invasive grass have been found in northeastern Wyoming in the last year. The first species *Ventenata* (*Ventenata dubia*) has been found in many areas surrounding Sheridan since last summer. Bureau of Land Management (BLM) personnel also found two small infestations in Campbell County on BLM parcels in the northeast quarter of the county. The other species Medusahead Wildrye (*Taeniatherum caput-medusae*) was found in two locations outside of Sheridan, but has yet to be found in Campbell County. Hopefully this article will give you some general information of these species and control options that can be implemented for management.

Ventenata is a winter annual grass species that germinates and begins growth in the fall and before growing to maturity in the spring and early summer. The species usually grows up to a foot to 18 inches tall. It is covered in small hairs which gives the plant a shiny appearance. It has a band at the growth node that is dark red to black and has a long membranous ligule where the leaf attaches to the stem. Its inflorescence is an open panicle that has a pyramid shape. The plants awns on the seed heads are bent and twisted like those of wild oat.

This grass usually forms patches that have a slightly off color than your other native range vegetation. For more information and pictures of the species please go our website (<https://www.ccgov.net/189/Weed-Pest>) and click the links for the Invasive Grass Quick Guide and Factsheet.

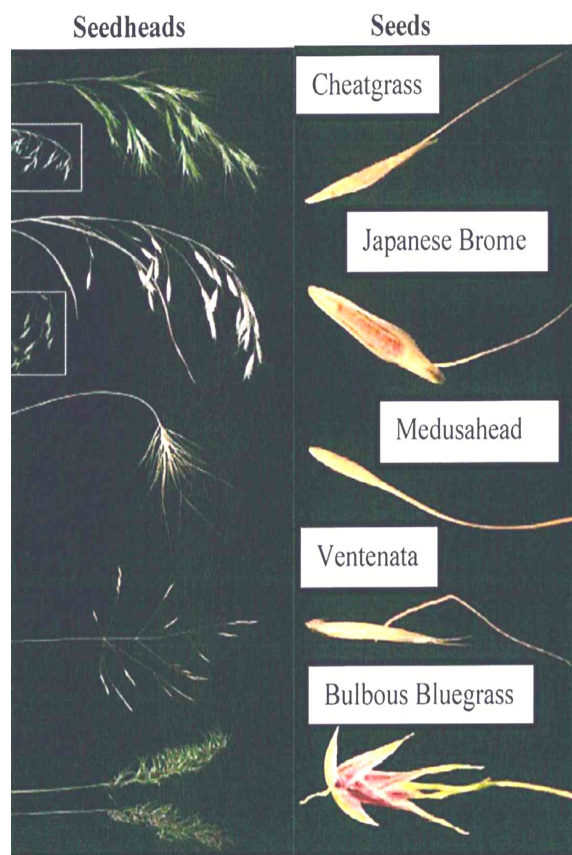

Medusahead is also a winter annual grass that has a life cycle similar to *Ventenata*. It usually grows up to a foot to 15 inches tall. The entire plant is covered in small soft hairs, but there may be some longer hairs along the collar of the leaf. The growth node is green (darkens at maturity) and the ligule is membranous and squared off. The inflorescence is a spike with long awns, and the flowering head will be almost as wide as it is long. The awns are long (1-4 inches), twisted, and stiff. This species can form dense patches quickly that can leave a large quantity of litter preventing any other species from growing. This can lead to increased fire danger in areas of infestations. You can find pictures and other information about this species in the same link in the above paragraph.

If you find isolated patches act quickly to implement control methods, as these species are annuals and only reproduce by seeds. A few years of control measures on isolated patches can lead to eradication as their seeds are not viable for long periods of time. Both species are similar to cheatgrass in characteristics and life cycle. We suggest implementing control measures that are known to work on cheatgrass. In northeast Wyoming that primarily means use of herbicides in the Fall (September-October) to try to control this weed as it germinates in the fall. Mechanical means may work in some situations such as deep plowing or ripping or even hand pulling for small infestations.

If we let these species get out of control it could be a rude awakening to farmers and ranchers in our area. These species have been known to outcompete and have far worse forage capabilities (very high silica content) than cheatgrass. We need your help with looking for and finding these species, if you come across one of these invasive grasses please contact us immediately. Hopefully, with the help from the people of Campbell County and northeast Wyoming, we can stop these species before they become established in our state.

Campbell County
Weed & Pest

2017 Agriculture and Natural Resources Expo

The Campbell County Conservation District hosted the annual Ag and Natural Resources Expo on April 25, 2017 at the Cam-Plex, to raise awareness and understanding of Campbell County’s agriculture and natural resources.

All activities were hands-on and in total 782,3rd grade students from 16 public schools including a private school were educated through this program. There were 30+ activities including wool felting, milking, owl pellets, macro-invertebrate identification, weed and pest control, chicken, sheep, and cattle education and much more.

The Campbell County Conservation District is especially grateful to the FFA members from Gillette and Wright who volunteered all day!

Wright FFA Randal Haefele, FFA Advisor; Austin Seeley, Cole Thomas, Wyatt Real, Jozi Edwards, Kodi Edwards, Brandi Fuller, Kinlee Priewe, Kelcy Strohschein, Morgan Preston, and Mikaela Easton
Gillette FFA Camille Prella, Clayton Scott, John Scott, Wyatt Geis, Tyser Wilson, Mary Woodworth, Tyler Boller, Eilish Kelsey, Colton Huddleston, and Brandi Oedekoven

The Expo could not have been possible without the following people and organizations. **Thank you very much!**

RETURN SERVICE REQUESTED

Campbell County Fair July 28 through August 7

The CCCD staff will be attending the trade fair August 3-6 at the Cam-Plex, Gillette, Wyoming. Stop by to visit and see what we have been doing and what fun activity we will have for the kids. The Stream/Erosion Trailer educational activity will be outside the Wyoming Center at 11am and 1pm

Saturday, August 5 and 1pm and 3pm on Sunday, August 6!

ENTER TO WIN A 2017 JOHN DEERE GATOR!

Your \$25 tax-deductible donation to the Wyoming Natural Resource Foundation enters you in a drawing to win a 2017 John Deere XUV 560 Gator, or Homak Pro-Series Rolling Tool Cabinet. The drawing will be held on November 28 in Casper at the WACD/WNRF state convention. Tickets will be available at the CCCD Fair Booth and at our office located at 601 4J Court in Gillette. **ONLY 650 TICKETS WILL BE DISTRIBUTED.**
